# INSTRUCTIONS FOR AUTHORS

The editors and publishers of THE AMERICAN JOURNAL OF CARDIOLOGY welcome concise articles devoted to cardiovascular disease. Articles must be contributed solely to THE AMERICAN JOURNAL OF CARDIOLOGY and become the property of the Publisher. The Publisher reserves copyright and renewal on all published material, and such material may not be reproduced in any form without the written permission of the Publisher. Statements in articles are the responsibility of the authors. Authors will assist the editors in the prompt processing of manuscripts if these instructions are followed:

## THE WHOLE PAPER

- Address manuscript to Simon Dack, MD, American Journal of Cardiology, 666 Fifth Ave., New York, NY 10019.
- Submit two copies of all elements of the article: text, references, legends, tables and figures.
- Arrange the paper in this order: (1) title page; (2) abstract; (3) text; (4) references; (5) legends; (6) tables; and (7) figures.
- Number all pages in above sequence, beginning with title page as 1, abstract as 2, etc.
- Type all matter: (1) on  $8\frac{1}{2} \times 11$  opaque white bond paper; (2) in duplicate; (3) on one side of each sheet only; (4) double-space; (5) leave wide margins, all four sides.

## THE TITLE PAGE

- Number title page as page 1.
- Include first names, degrees and, where applicable, FACC for all authors.
- Insert at bottom: name and address of institution from which work originated plus information about grants.
- Add at bottom the phrase "Address for reprints: . . ." followed by full name and address with zip code.

## THE ABSTRACT

- Limit words as follows: 100 to 250 words for major articles; 50 to 100 words for case reports.
- Add at end of abstract: an alphabetical list of 2 to 6 key words and subjects for indexing.

## THE TEXT

- Number pages in sequence after abstract.
- Type in duplicate; double-space.
- Do not use abbreviations such as SVC, WPW: write out; superior vena cava, Wolff-Parkinson-White. Abbreviate measurements (mm, kcal and the like) as recommended in the Style Manual for Biological Journals, American Institute of Biological Sciences, 3900 Wisconsin Avenue, N.W., Washington, D. C.

- Cite in numerical order every reference, figure and table. (Order of mention in text determines the number given to each.)
- Place acknowledgments at end of text, before references.

## THE REFERENCES

- Type in duplicate; double-space.
- Place immediately after text, and number pages in sequence after text page numbers.
- Number the references in order in which they are mentioned in text.
- Follow the general arrangement, abbreviations and punctuation styles shown below.

## THE FIGURE LEGENDS

- Start at top of new page.
- Type in duplicate; double-space.
- Number pages in sequence after last page of references.
- Identify at the end of each legend and in alphabetical order all abbreviations in the figure described.

## THE TABLES

- Start each table at top of new page.
- Type in duplicate; double-space.
- Number pages in sequence after last page of legends.

- Give each table a number (in roman numerals: Table I, II, etc.) and a title. Number the tables in order in which they are mentioned in the text.
- Provide a footnote to each table—identifying in alphabetical order all abbreviations used.

## THE FIGURES

- Submit 2 glossy prints (not originals) of each photo and drawing.
- Please note that art work of published articles will not be returned.

- Use black ink for all charts (line drawings). Make decimals, broken lines, etc. strong enough for reproduction.
- Use arrows to designate special features.
- Crop photomicrographs to show only essential field.
- Identify figures on back by number and author's name.
- Number figures in order in which they are mentioned in the text.
- Indicate top of each figure.
- Submit written permission from publisher and author to reproduce any previously published figures.
- Limit figures to number necessary for clarity. The publisher allows a limited sum toward reproduction.
